Real Energy. Real Tokens. Real Flywheel.

One tap turns Tesla, solar, battery and EV miles into a scarce on-chain asset.

THE OPPORTUNITY

The energy economy is the next $10T sh

Tesla, solar and EVs scale faster than the grid settles.
A kilowatt-hour still has no native asset.

First-mover into tokenized clean energy.
Bitcoin-grade scarcity. Energy-grade demand.

$10T+ market. No native asset — until now.
We are the rails before the rails exist.

THE PRODUCT

One tap. Real tokens. Zero friction.

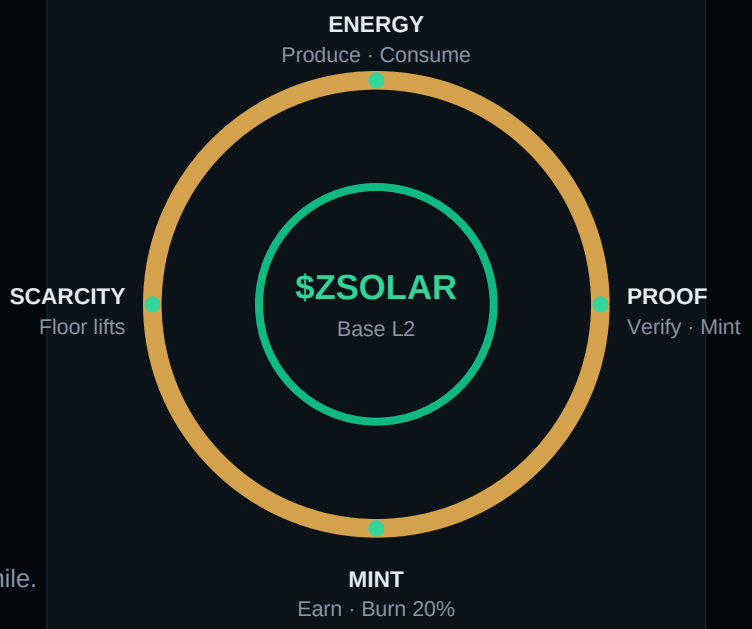
Connect Tesla, solar, battery, EV — done.
We verify the energy. You earn $ZSOLAR. Forever.

Proof-of-Genesis™
Cryptographic on-chain verification of every kWh and mile.
The trust layer no competitor can replicate.

Embedded wallet. Zero crypto friction.
Mobile-first. Apple-grade simplicity. Live on Base L2.

THE COMPOUNDING FLYWHEEL

Every kWh tightens the loop.



Users mint by producing or consuming clean energy.
20% of every mint is permanently burned.
3% auto-seeds the LP. Halving every 4 years.

TOKENOMICS

1T	10:1	$0.10
Hard cap	kWh per token	Launch price

75 / 20 / 3 / 2
User · Burn · LP · Treasury

VISION & TRACTION

A 100–200 year energy company.

Live beta. Real users. Real mints.
Tesla, SolarEdge, Wallbox connected.
Patent-pending Proof-of-Genesis™.

Energy Price Oracle = Series A moat.
Built to outlast every grid we touch.

THE ASK · $5M SEED ROUND

Lead investor + strategic partner.

- **Board seat —** co-shape the tokenized energy economy from da
- **Lyndon Rive —** strategic advisor through Series A.
